

Changepoint 2017 SP1

18.01.110.000 API General Patch Release Notes

Release date

December 16, 2021

Fixed Issues

Product Area	Customer Tracking Number	Changepoint Internal Tracking Number	Fixed Issue Description
API	CPE-2021-00352	CPE-2021-00365	ApiTime.Add method call does not return an error when a new time entry is not created due to invalid data input.

Upgrade instructions and additional information

1. Uninstall the previous version of the Changepoint API using Windows Control Panel.
2. Copy the contents of the API Setup folder to the location on the server where Changepoint API will be installed.
3. Run Setup.exe and follow the prompts to install the COM API and Web Services. For more information, see the *Changepoint API Installation Guide*.
4. Run the Login Settings utility on the API\CP Web Services\Web.config file to configure the database connection settings.
5. Open SQL Server Management Studio with sufficient rights and execute 1801110000.sql against the Changepoint database.

Caveats and notes

- The patch installer is available in English only.

Dependencies and overrides

The following patches must be applied prior to this patch in the specified order:

	Patch
1	18.01.107.000

The following release patches will be overwritten by this patch:

None.

New or changed files

	Website files
1	ChangepointAPI2.dll

Changepoint Product Extensions

Product extensions include any code that has been added, modified, or customized in any way. It is strongly recommended that customers who deploy Changepoint product extensions in their Staging, Test/QA, or Production Environments review the list of files in the “New or changed files” section of this patch, to assess whether there is any impact.

Contact Changepoint Customer Enablement prior to applying this patch if any of the code associated with the product extension is deemed to be at risk. Failure to do so may result in the files being overwritten or deleted and the extended functionality failing.
