

ChangePoint 2022-R9-API Release Notes (22.00.051.000)

Release date

October 31, 2022

New features and enhancements

- Resource names were added to the “Locked by” API error messages.

Upgrade instructions and additional information

1. Uninstall the previous version of the ChangePoint API using Windows Control Panel.
2. Copy the contents of the API Setup folder to the location on the server where ChangePoint API will be installed.
3. Run Setup.exe and follow the prompts to install the COM API and Web Services API. For more information, see the ChangePoint API Installation Guide.
4. Run LoginSettings.exe to configure the \CP Web Services\web.config file.
5. Enable Web Services Enhancements (WSE) if required.
6. Open SQL Server Management Studio with sufficient rights and execute 2200051000.sql against the ChangePoint database.

Caveats and notes

- The release package installer is available in English only.

4	Changepoint.CommonServices.vb.dll
5	Changepoint.Controls.vb.dll
6	Changepoint.WebApi.Models.dll
7	ChangepointAPI2.dll

ChangePoint Product Extensions

Product extensions include any code that has been added, modified, or customized in any way. It is strongly recommended that customers who deploy ChangePoint product extensions in their Staging, Test/QA, or Production Environments, review the list of files in the “**New or Changed Files**” section of this document to assess whether there is any impact.

ChangePoint Customer Enablement should be contacted prior to applying this patch if any of the code associated with the product extension is deemed to be at risk. Failure to do so may result in the files being overwritten or deleted and the extended functionality failing.
