Upgrade Notes

Sync Upgrade Notes

Bridge

- 101247: If Tasktop Sync is using a custom log4j.xml file to control logging configuration and Microsoft Azure DevOps (TFS) connector diagnostics are not desired, the following should be added to the log4j.xml file:

```
<logger name="com.microsoft">
    <level value="error"/>
</logger>
<logger name="httpclient.wire.header">
    <level value="error"/>
</logger>
<logger name="httpclient.wire.content">
    <level value="error"/>
</logger>
```

Connector-Specific Upgrade Notes

Atlassian Jira

- 99954: If the following instructions are not observed, any integrations containing Service Desk projects will not work. Any existing mappings for Jira artifacts will now ignore requests that have associated Service Desk requests unless new mappings are created for Service Desk requests, and the Service Desk Type mappings field is populated for the Jira connection.

General (Services)

- 102408: The following Vendor repository versions are no longer available under Tasktop's general support. These versions are now available under extended support only:

  Atlassian Jira (Software & Core) - 7.7 Micro Focus ALM - 12.2 Micro Focus Dimensions RM - 12.5.1 Micro Focus Solutions Business Manager - 11.0, 11.0.1.1, 11.1, 11.2 Tricentis Tosca - 10.3

  Please reach out to your Tasktop contact if you are currently on one of the aforementioned versions and they will be able to guide you accordingly.

Micro Focus ALM Octane

- 100884: To fix an issue where integrations with the 'Blocked Reason' field are unable to update artifacts, please ensure that business rules involving 'Blocked Reason' are disabled in Micro Focus ALM Octane.

Microsoft Azure DevOps Server (TFS)

- 101984: Beginning on 03/02/2020, Azure DevOps Services users must use Personal Access Token authentication, as standard authentication will no longer be supported by Microsoft. Please check your authentication methods and update as needed. If authentication is not updated correctly, pre-existing integrations may stop running. Azure DevOps Server (on-prem) users can continue to use standard authentication.

Planview Enterprise

- 99388: Mappings containing any 'Lifecycle Role' fields are no longer supported and will need to be updated.

QASymphony qTest Manager

- 101592: Users of qTest Manager OnDemand (9.8.8+) must update the minimal permissions for the credentials used to connect to Tasktop Sync to include: 'Manage Field Settings.' If they do not update, their integrations will stop running.

ServiceNow

- 101369: A 'Comment Enablement' field is now available for ServiceNow connections. By default, this will be set to 'Enabled' which will automatically enable comments for all artifact types. Customers with complex permissions for comments should consider changing this setting to 'Autodetect.'

Fixes

Sync Fixes

Bridge

- 101247: Fixed an issue where verbose logging from the Microsoft Azure DevOps (TFS) connector was enabled by default.
- 101225: Fixed an issue where markup language, "Microsoft Azure DevOps Server (TFS) HTML," failed to load.

General

- 98768: Fixed an issue where markup languages of sideloaded connectors failed to load.

Connector-Specific Fixes

Atlassian Jira

- 101376: Fixed an issue where duplicate Jira users caused issues with person mappings.
- 100877: Fixed an issue where setting a value for the 'Assignee' field caused creation of Test Executions to fail.
- 99400: Fixed an issue where a Jira Profields plugin custom field was blocking Jira synchronizations.
- 99316: Fixed an issue where an HTML response from Jira was not handled properly.

BMC Remedy

- 100831: Fixed an issue where retrieving an artifact with a 'no-longer-valid person' value caused an error.
- 100815: Fixed an issue where artifact retrieval failed and produced a duplicate field value message.
- 100395: Fixed an issue where artifacts with empty categorization tier fields caused issues during retrieval.
- 100202: Fixed a performance issue during validation of a BMC Remedy connection.
- 100060: Fixed an issue where Tasktop Sync could not retrieve field options if they had dependencies on other field options with special characters.
- 100059: Fixed an issue in BMC Remedy versions predating 18.08, which prevented Tasktop Sync from retrieving the artifact schema when sharing the same field across multiple views.
- 99548: Fixed an issue where duplicated option labels of single-select fields caused issues during artifact retrieval and update.

CA Agile Central (Rally)

- 101405: Fixed an issue where portfolio item reference links were broken due to an encoded path segment.
- 100242: Fixed an issue where concurrent creation of CA Agile Central changesets caused an error.
- 84132: Fixed an issue where CA Agile Central workspaces with no open projects caused an error.

IBM Rational ClearQuest

- 100623: Fixed an issue where attachments with percentage signs in the description caused an error.

IBM Rational DOORS

- 101090: Fixed an issue where cross-module in-links were created incorrectly.
- 101062: Fixed an issue where some IBM Rational DOORS errors were not automatically retried.
- 100788: Enhanced connector logging to enable improved troubleshooting.
- 100439: Improved performance when retrieving a vast number of folders and modules from IBM Rational DOORS. Users can further improve performance by specifying a subset of folders/modules for Tasktop Sync to access.
- 99281: Fixed an issue where links to an inaccessible object blocked integrations.

IBM Rational DOORS Next Generation

- 101223: Fixed an issue where configurations retrieved from IBM Rational DOORS Next Generation were inconsistent/wrong.

IBM Rational Team Concert

- 99495: Fixed authentication failures using Kerberos when a host alias was used.

Jama

- 101333: Fixed an issue where Jama 2015.X Formatted ID search returned too many objects.
- 99617: Jama Connect can now be configured to strictly use the SOAP API upon integration.

Micro Focus ALM

- 101533: Created a workaround for a server-side defect that was producing errors after simultaneous calls to versioned projects.
- 101382: Improved user experience when invalid or unknown person values cause person transformation to fail.
- 101303: Fixed an issue for Micro Focus ALM versions 12.50+, where attachments were not properly synchronizing when there were multiple attachments with the same case-insensitive name.
- 100818: Fixed an issue for Micro Focus ALM versions 12.50+, where attachments were not synchronizing properly when there were multiple attachments with the same case-insensitive name.

Micro Focus PPM

- 71336: Scheduled finish date is now marked as read-only for updates.

Micro Focus Solutions Business Manager

- 100497: Fixed an error caused by empty double sub-relational fields in Micro Focus Solutions Business Manager.

Microsoft Azure DevOps Server (TFS)

- 101401: Azure DevOps Services now supports Personal Access Tokens with a minimal set of permissions.
- 100580: Fixed an issue where table formatting was lost when synchronizing rich text fields into Microsoft Azure DevOps (TFS).
- 100137: Fixed an issue where Microsoft Azure DevOps Server (TFS) failed to execute a WIQL query to search for new and changed artifacts in a team project.
- 99526: Fixed an issue that blocked synchronizations when trying to synchronize the 'Tags' field.
- 99299: Fixed an issue where Microsoft Azure DevOps Server (TFS) did not enforce a consistent ID for team projects and team project collections.

Microsoft Sharepoint

- 100673: Added additional validation for expired sessions in order to prevent permissions errors.

Planview Enterprise

- 101914: Fixed an issue where the Planview connector retrieved fields that were not relevant to the integration.
- 101514: Fixed an issue where previously supported fields were no longer available for mapping in versions 4.20.2+, 4.19.12+, and 4.18.24+.
- 100635: Fixed an issue where synchronization failed with 'Code must contain only digits' error.
- 100167: Fixed an issue where authentication errors blocked synchronizations.
- 99388: Fixed an issue where attempting to retrieve a value for an unsupported field caused an error.

QASymphony qTest Manager

- 99841: Fixed an issue where users received Authentication State Expired errors.
- 97515: Fixed an issue where a QaSymphony qTest Manager synchronization was blocked by a "value not allowed" error.

Salesforce

- 100170: Fixed an issue where only a subset of a dependent picklist's values were available.

ServiceNow

- 101369: Added a 'Comment Enablement' setting to the ServiceNow repository settings.

VersionOne

- 102023: Fixed an issue where attachments would not synchronize into VersionOne if the source repository did not provide an attachment size.

Features

Connector-Specific Features

Atlassian Jira

- 100161: Added support for Jira version 8.5.
- 99954: To flow Jira requests associated with Service Desk requests, users can now create Service Desk request mappings to be used in conjunction with Jira request mappings. Private comments are now supported for Service Desk requests.

BMC Remedy

- 97503: Added support for custom fields on Problems and Change Requests.
- 97494: Added support for custom fields on Work Orders and Incidents. Expanded Task custom field support for BMC Remedy 9.1.02+.
- 97493: Added support for custom fields on Tasks for BMC Remedy versions 18.08+.

CA Agile Central (Rally)

- 93770: Added support for CA Agile Central version 2.0.

IBM Rational DOORS

- 99797: Added support for IBM Rational DOORS version 9.7.

IBM Rational DOORS Next Generation

- 97414: Added support for integrating with change set enabled streams.

iRise

- 100198: Added support for iRise version 11.6.

Jama

- 99116: A custom HTTP header can now be set on a Jama Connect repository. This header will be applied to all HTTP requests made to the repository.

Planview Enterprise

- 99955: Planview Enterprise One branding has been updated. A browser cache reset may be needed to display the new logo.

Planview LeanKit

- 99956: Updated Planview LeanKit branding.

QASymphony qTest Manager

- 99497: Added support for QASymphony qTest Manager version 9.7.11.

ServiceNow

- 100786: Custom comment fields are now supported.
