Upgrade Notes

Connector-Specific Upgrade Notes

Atlassian Jira

- 110608: The 'Assigned Sprint' field has been updated to 'Active or Future Sprint' and will only contain values corresponding to what is included in the 'Active Sprint' and 'Future Sprint' fields in the Jira UI. Previously, this field could contain an incorrect completed sprint value. Now, when a sprint is completed, the field will be cleared. For a complete list of sprints, including closed sprints associated with a Jira issue, please use the 'Sprint(s)' field.

Jama

- 112554: If you have an existing Jama synchronization set up for Requirements and have the 'Set' field mapped, you will need to delete the existing field mapping for the 'Set' field and replace it with a Container link mapping.

Microsoft Project Server

- 111707: If you have an integration with duration fields calculated in days or weeks, you will need to configure the Work Day Hours and Work Week Hours fields on the Repository Connection screen.

  Any extensions converting Work Day Hours or Work Week Hours should be removed.

Tricentis Tosca

- 111156: If using a TCFolder collection to mirror ExecutionLists folders, you will need to update your routing manually to ensure ExecutionList folders synchronize properly. This should not affect any existing integrations.
