Upgrade Notes

Sync Upgrade Notes

General

- 119093: For security reasons, Tasktop Sync no longer allows TLS 1.0 or 1.1 communication to repositories by default. If your repository connection fails with the following message, "The server selected protocol version TLS10 is not accepted by client preferences [TLS12]", you should reach out to your IT department to request that the repository be reconfigured to allow TLS 1.2 or greater.

If re-configuring your repository is not an option, please follow the steps below to enable the banned protocols in your Tasktop Sync installation:

1. Find the JRE directory provided with your installation. This will be in the Program Files for Tasktop Sync in Windows installations, or at the top-level inside your Linux installation.
2. Open the jre/lib/security/java.security file.
3. Find the line starting with "jdk.tls.disabledAlgorithms".
4. Remove "TLSv1" and/or "TLSv1.1", depending on your needs.
5. Restart your Tasktop Sync application to continue using the affected repositories. [Security Fix]
