ChangePoint 2022-R11-ChangePoint Analytics Release Notes (22.00.053.000)

Release date

January 31, 2023

New features and enhancements

- Certified Cognos Analytics 11.2.3

- Added Credit GL account and Debit GL account fields to the Project and Task query subjects

- Added Contract purchase order query subject

- Added Purchase Order Number and PurchaseOrderId fields to the Contract and Invoice query subjects

Installation and upgrade instructions and additional information

Importing the Cognos model

1. Copy the applicable model.zip from the package to a folder where the Sync Utility is installed.

2. Import the base data model (model.zip).

3. Add customized field labels and configurable fields to the data model.

    For more information, see the *ChangePoint 2022 R11 Installation Guide*.

Upgrading Changepoint Analytics

You can do either of the following:

- Upgrade an existing Cognos Analytics 11.2.1 version to Cognos Analytics 11.2.3

    For more information, see the "Upgrading Cognos Analytics" chapter of the *ChangePoint 2022 R11 Installation Guide*.

    Upgrade considerations – Users that have existing Analytics dashboards that use a custom HTML table visualization must update the custom visualization. For more information, see the [Adding Changepoint entity profile links to an Analytics dashboard table](#) article on the ChangePoint Customer Success Center.

- If Cognos Analytics was not previously installed, you can install Cognos Analytics 11.2.3.

For more information, see the "Installing and Configuring Cognos Analytics" chapter of the *ChangePoint 2022 R11 Installation Guide*.

Caveats and notes

- The release package installer is available in English only.

Dependencies and overrides

The following releases must be applied prior to this release in the specified order:

	Release version
1	22.22.053.000 (Enterprise)

New or changed files

	Release files
1	Model.zip
2	Model-ITD.zip

ChangePoint Product Extensions

Product extensions include any code that has been added, modified, or customized in any way. It is strongly recommended that customers who deploy ChangePoint product extensions in their staging, test/QA, or production environments review the list of files in the "New or changed files" section of this document to assess whether there is any impact.

ChangePoint Customer Enablement should be contacted prior to applying this patch if any of the code associated with the product extension is deemed to be at risk. Failure to do so may result in the files being overwritten or deleted and the extended functionality failing.
