GENERAL ADMINISTRATION IN PLANVIEW ENTERPRISE ARCHITECTURE

OVERVIEW

General Administration training for Planview Enterprise Architecture is an immersive, interactive class that teaches administrators the best-practice methods, skills, and techniques for efficient management of the Enterprise Architecture repository.

This course provides the skills needed to manage user privileges and security, monitor and control data, and manage portal configuration. This allow you to ensure the Enterprise Architecture implementation meets the needs of your user community. This course is recommended also to prepare individuals for a developer role.

LEARNING OBJECTIVES

At the end of this course, you will learn the following skills:

- Effectively manage and administer the repository.
- Deploy developed extensions and customizations.
- Gain a basic knowledge of security and typical users, groups, and roles.
- Understand the Enterprise Architecture portal.
- Understand component layouts.

LEARNING LEVEL

Intermediate

Intended for learners who have mastered the basics and are ready to delve deeper into the subject. It explores more complex concepts, techniques, and applications, allowing participants to enhance their knowledge and practical skills.

WHO SHOULD ENROLL

This course is ideal for administrators who will be responsible for managing the Enterprise Architecture repository on behalf of their organization or business unit.
