ESSENTIALS IN PLANVIEW ENTERPRISE ARCHITECTURE

OVERVIEW

Essentials training for Planview Enterprise Architecture teaches everything you need to know to set you and your team up for success by understanding the core activities required for using Planview Enterprise Architecture.

This course provides an understanding of how to use and navigate the Enterprise Architecture interface, work with the various portfolio components to optimize data management activities, develop out-of-the-box data visualizations for your key stakeholders and gain an understanding of the power of the Enterprise Architecture Metamodel.

LEARNING OBJECTIVES

At the end of this course, you will learn the following skills:

- Use Enterprise Architecture menus, ribbons, tiles, and column sets.
- Understand the Enterprise Architecture Metamodel.
- Know how to perform data management tasks.
- Understand the enterprise data framework.

LEARNING LEVEL

Beginner

Aimed at individuals who have some familiarity with the subject but are still in the early stages of learning. Participants build a strong foundation for more advanced studies.

WHO SHOULD ENROLL

This course is ideal for Architects, Data Stewards, and Administrators who are new to the Enterprise Architecture platform, are adding the Enterprise Architecture functionality to an existing implementation, or have transitioned from an older version of Troux.

ESSENTIALS IN PLANVIEW ENTERPRISE ARCHITECTURE
