Tasktop Release Notes - 22.4.2

Posted: October 18, 2022

Upgrade Notes

Connector-Specific Upgrade Notes

Atlassian Jira

- 125434: Labels created for custom label fields may still not be returned correctly by the Jira Cloud API. This means that some label values may not appear when mapping field values to the model in Hub. As a workaround, users should set the Tasktop model field to accept unmapped values.

GitLab Issues

- 126415: Upon upgrading, an artifact handle migration and collection search migration will be triggered, which may take a significant amount of time.

Jama Connect

- 118592: Upon upgrade, the Jama Item Path field will no longer be available and will be removed from any existing collection mappings.

Planview PPM Pro

- 126641: The following upgrade steps are only necessary if using the new "Project search" repository query released in Tasktop 22.3.
    - After upgrading an error will appear in the Activity view relating to the PPM Pro migration.
    - Go to the 'Project search' repository query being used by the PPM Pro collection, hit refresh, then save the repository query.
    - In the Activity view, prioritize the PPM Pro background job, and the issue will be resolved.

Fixes

Planview Tasktop Hub Fixes

Change Detection

- 126160: Fixed an issue where change detection was delayed for collections with many projects.

Extensions

- 126894: Fixed an issue where key-value store pairs could not be deleted properly.

Integrations

- 126036: Fixed an issue where gateway collections were sometimes not displayed on the Integration Overview and Artifact Filtering screens.

Operational Database

- 125738: Fixed an issue where processing slowed down when the number of artifact events was extremely high.

Product Upgrades

- 126381: Fixed an issue where repositories sometimes could not be enabled after an upgrade.

Repositories

- 126835: Fixed an issue where the concurrency limit on a repository could not be cleared.

Settings

- 126929: Fixed an issue where an error appeared when navigating to the Settings screen.
- 126148: Fixed an issue where the 'To Addresses' email settings field did not appear in Hub Cloud.

Twinless Artifact Update

- 126652: Fixed an issue where previously configured single select values did not appear.

- 125380: Fixed an issue where duplicate email entries appeared in the User Count Report.

Work Item Synchronization

- 125112: Fixed an issue where Hub ran extensions on artifacts that were filtered out.

Connector-Specific Fixes

Atlassian Jira

- 127241: Fixed an issue where the Jira connector incorrectly listed options for labels during retrieval.
- 127044: Fixed an issue where having multiple custom fields of type "Test Type Select List" or "Pre-Condition Type Select List" caused an error for repositories with the Xray on-prem plug-in.
- 126577: Fixed an issue where linked Epics sometimes failed to synchronize.
- 126366: Fixed an issue where listing labels failed when the repository had a large number of labels.
- 126324: Improved the handling of folder listing for unsupported versions of the Xray plugin (versions earlier than 6).
- 126101: Fixed an issue where upgrading Hub with an expired Jira password caused an error.
- 125564: Fixed an issue that resulted in performance degradation when both R4J and Xray plugins were installed on the same integrated Jira instance.
- 125541: Fixed an issue where Xray Server support was enabled for unsupported versions of the Xray Server plugin.
- 125434: Fixed an issue where labels sometimes were not returned correctly on Jira Cloud.

Broadcom Clarity

- 125669: Fixed an issue where sub-second values for Actuals Sum for Labor Resources caused an error.

Broadcom Rally

- 126209: Fixed an issue where "Defect" types for Rally Test Cases' Work Product field could not be synchronized.
- 126015: Fixed an issue where the Blocked/Blocked Reason fields could not be updated.
