Hub Release Notes - 24.4.2

Posted: November 19, 2024

Fixes

Planview Hub Fixes

Artifact Relationship Management (ARM)

- 195236: Fixed an issue where synchronizing artifact links failed if an unrelated integration was blocked by a failed background job.

Collections

- 185810: Fixed an issue where Affinity Modeling did not work as expected.

Container Routing

- 171238: Fixed an issue where duplicate project names appeared on Artifact Routing and conditional routing for Planview Portfolios.

Product Upgrades

- 178909: Fixed an issue where unexpected errors during upgrade processes sometimes resulted in 'Expected a single result' or 'conflicting key' errors.

Work Item Synchronization

- 189367: Fixed an issue where an error occurred when moving an item to a new board in AgilePlace.
- 144680: Fixed an issue where synchronization of comments and attachments was delayed.

Connector-Specific Fixes

Planview Portfolios

- 176502: Fixed an issue where artifacts in Strategy integrations did not complete processing.

Polarion ALM

- 189317: Fixed an issue where change detection failed.

TestRail

- 181887: Fixed an issue where the completed_on field did not parse correctly.

Features

Planview Hub Features

Activity & Issues

- 199969: Added a "Transient" queue to the Failed section of the Activity screen to include failed activities that typically self-correct.

User Management

- 144634: Upgraded Keycloak to 24.0.5.

Connector-Specific Features

Aras Innovator

- 176460: Added support for Aras Innovator version 32.

Atlassian Jira

- 196860: Added support for Atlassian Jira Service Management version 10.1.x.
- 196861: Added support for Atlassian Jira version 10.1.x.
- 192634: Added support for Component as a work item.
- 181328: Added support for Atlassian Jira Service Management version 10.0.x.
- 181327: Added support for Atlassian Jira version 10.0.x.
- 144271: Added support for Test Step Result attachments in Zephyr Cloud.
- 197465: Added support for Xray Cloud Location field in Repository settings. This field should contain only the base URL.

Blueprint

- 176459: Added support for Blueprint version 15.1.

Broadcom Clarity

- 137215: Added support for Broadcom Clarity version 16.2.

Digital.ai Agility

- 200151: Added support for Digital.ai Agility version 24.3.
- 175535: Added support for Digital.ai Agility version 24.2.

Micro Focus ALM Octane

- 176139: Added support for Micro Focus ALM Octane on Premise version 24.3.

Micro Focus ALM/Quality Center

- 153088: Added support for the API Key Access with OAuth2.0 Authentication via Proxy authentication method,

Micro Focus PPM

- 144833: Added support for Micro Focus PPM version 2024.2.

Microsoft Azure DevOps Server

- 202193: Added an OAuth 2.0 Client Credentials authentication method for the Microsoft Azure DevOps Server connector.

Planview Portfolios

- 176403: Added support for synchronizing Strategy Structures.

Polarion ALM

- 200152: Added support for Polarion ALM on Premise version 2410.

ServiceNow

- 176138: Added support for ServiceNow Xanadu.

SmartBear QAComplete

- 176086: Added support for SmartBear QAComplete on Premise version 14.5.

- 146873: Added support for SmartBear QAComplete on Premise version 14.4.

Tricentis qTest

- 188944: Added support for Tricentis qTest On Premise version 2024.2.

Tricentis Tosca

- 176783: Added support for Tosca version 2024.1.

SDK-Specific Features

Authenticators

- 144209: Added an OAuth 2.0 Client Credentials authentication method for Jira, AgilePlace, AdaptiveWork, TargetProcess, and TestRail connectors.

Hub Release Notes - 24.4.3

Posted: December 19, 2024

Fixes

Connector-Specific Fixes

Atlassian Jira

- 209048: Resolved the issue of duplicate versions being generated during the dynamic version creation.

Features

Connector-Specific Features

Atlassian Jira

- 209219: Components field has been added as a multi-relationship in Hub.

Hub Release Notes - 24.4.4

Fixes

Planview Hub Fixes

Planview Hub

- 210637: Updated Tomcat to 9.0.98.

Hub Release Notes - 24.4.5

Posted: January 15, 2025

Fixes

Planview Hub Fixes

Activity & Issues

- 195458: Fixed an issue where the Activity screen did not display activity counts, or displayed out of date counts.
- 136070: Fixed an issue where failed events could not be searched by artifact ID if the error message was too long.

Collections

- 146062: Fixed an issue where rendering a large list of fields on the mapping dropdown was delayed.
- 132994: Fixed an issue where the incorrect model was displayed after filtering on the Collections screen.
- 108468: Fixed an issue where refreshing projects while managing invalid projects resulted in the invalid projects being removed rather than replaced by the desired valid project.

Configuration History

- 134167: Fixed an issue where configuration import background jobs would not complete when integrations relating to it were deleted.

Configuration Import/Export

- 134856: Fixed an issue where the Selective Import and Full Import buttons were not visible on the Settings screen.

Extensions

- 141951: Fixed an issue where deleting a key value from the UI removed the incorrect key value pair.

Operational Database

- 144166: Fixed an issue with the person reconciliation override UI that occurred when too many overrides were

configured for Hub using the Oracle database.

State Transitions

- 197766: Fixed an issue where option mapping could not be edited in a state transition parameter.

User Management

- 209634: Fixed an issue where users in the PlanviewLinkBridgeUsers group could not log in.

Work Item Synchronization

- 151718: Fixed an issue where events that were previously filtered out were not throttled properly.

Connector-Specific Fixes

IBM Engineering Workflow Management

- 206764: Added support for SVN Links (Git Commit link).

- 188944: Added support for Tricentis qTest On Premise version 2024.2.

Tricentis Tosca

- 176783: Added support for Tosca version 2024.1.

Hub Release Notes - 24.4.0.20241024-b7863

Posted: October 24, 2024

Upgrade Notes

Planview Hub Upgrade Notes

User Management

- 144213: A new property ssl.skip-verification has been added to "tasktop-hub.properties" to control SSL verification between Keycloak and Hub. By default, it is set to "true", which disables SSL verification. It is recommended to set it to "false" for any production instance with a valid SSL certificate configured. Please see more details in the user documentation.
