Release Information

Monthly Release Schedule

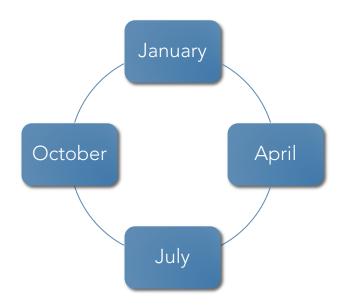

First Friday Release Notes Published

Second Friday • Release deployed to sandbox environments

Third Friday Release deployed to production environments

Features move from Beta to GA once a quarter

- Between GA releases, Beta features are available in sandboxes
- Beta features can be enabled in production environments by request

Get early access to features in your sandbox

- A sandbox is a snapshot of your production environment
- Beta functionality is enabled in sandboxes by default
- Don't have one? Contact your Account Manager (additional fee)

Note: We can't refresh your sandbox data between the second and third Fridays of the month

Current Month's Feature Status

Project Financials
KPI Trend Report Source
OData feed

GDPR support

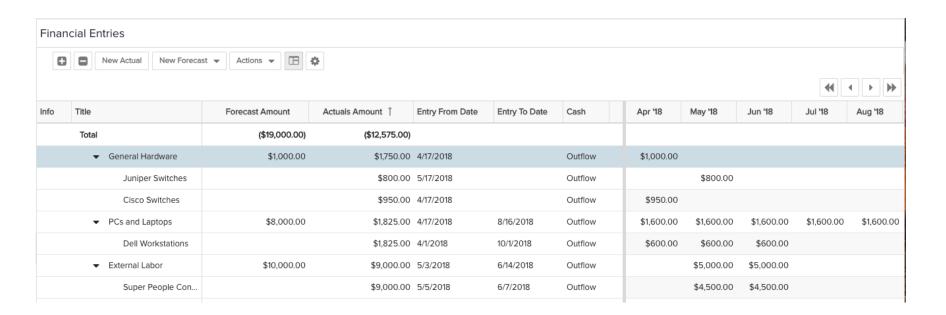

May Release – New Features

- Project Financial Entries (Beta)
- GDPR Support (GA)

Project Financial Entries

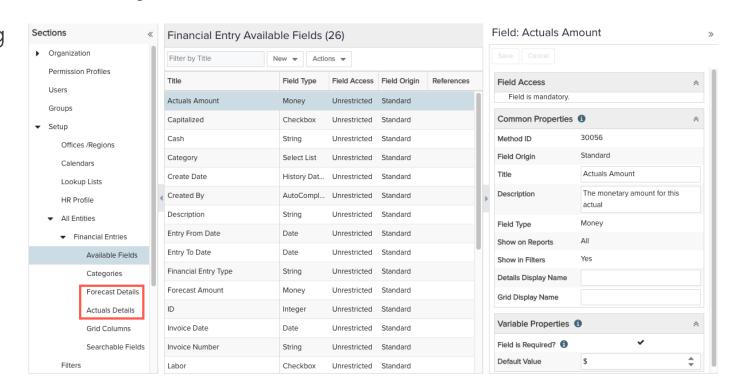

Task-level financials running in parallel, eventually deprecated

Project Financial Entries

Configure using self-service administration facility (SSA)

GDPR Tenets

GDPR	Description	PPM Pro Support
Right to be forgotten	Ensure that there is no information still in a system that could be used to personally identify a person who has opted out or is no longer a user of that system.	PPM Pro provides guidance for manually anonymizing personal information reflected in user interface elements.
		In addition, PPM Pro provides a product feature that programmatically anonymizes not only UI artifacts that present personal information, but also artifacts at deeper levels of the application, such as history tables and logs
Right to opt in	Do not collect data on a person until that person grants permission/that person opts in.	The customer is responsible for obtaining the potential user's agreement before adding a resource to PPM Pro.
Right to receipt of data	Respond to a former user's request for what information about them may still be in the system ("what info do you have on me?").	The customer is responsible for responding to this request and extracting any remaining information through reports or other means; there is no additional support from PPM Pro.

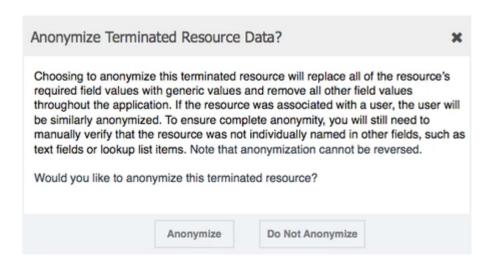

GDPR Tenets

GDPR	Description	PPM Pro Support
Right to be forgotten	Ensure that there is no information still in a system that could be used to personally identify a person who has opted out or is no longer a user of that system.	PPM Pro provides guidance for manually anonymizing personal information reflected in user interface elements.
