Planview Spigit™

Widget Guide
# for Administrators

Planview Spigit Widget Guide for Administrators

Overview

Spigit content is displayed on its various web pages using widgets. A widget is a software container that controls what you see on a page.There are two types of widgets in Spigit: system-generated widgets and editable widgets.

1. System-generated widgets automatically display whatever content they are programmed for.

2. Editable widgets are containers that site administrators can use to display text, images, video, links, and even more complex functionality such as iFrames and Ajax code. They use a WYSIWYG ("what you see is what you get") editing interface but also allow you to edit HTML code directly if the WYSIWYG interface is too limited for your purposes.

For instance, in the example above, a editable widget and a system-generated widget are shown: editable_widget66 (in red - notice the pencil icon, which indicates an editable widget), and Leading Ideas (in blue).

Important!
Widgets and Posts:
Ideas, Comments, Replies, and Reviews are all considered Posts. When a user performs any of these actions, they will be counted as a post. Posts accumulate. This is useful and measurable when using the Top Contributors widget, for example.
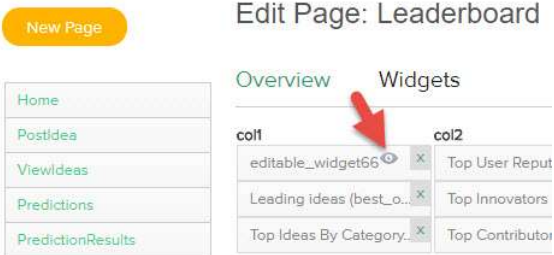

Deleted Widgets:
To add back deleted widgets in Site Editor, you must select Style: Border for them to appear.

Introduction

Spigit uses several hundred widgets. Only users with SuperAdmin and Admin privileges can edit widgets and place them on pages.

A widget preview is available. The site editor allows an administrator to receive an instant preview of an editable widget placed upon any page. This assists administrators in assessing the designs of their pages as well as reminding them of the placement of the editable content widgets. To access the preview option, go to Site Editor. Click the desired Page to make it active. Click the Widgets tab. Click the 'eye' icon inside the widget box: a pop up window will appear and display the user view of the widget, complete with content.

Planview Spigit Widget Guide for Administrators

Widgets by Page

Each of the pages listed in the tables of this section can contain only the widgets listed for them below.

Page: AllBlogs

Contains the suggested widgets below:

1. All Blogs (aggregated_blogs)
2. Your Blog Link (post_blog_link)
3. Spigit Administrator (user_stats)

And on the widget dropdown, the "Complete Widget List" on page 6.

Page: Analytics

As of the 4.3 Release, this page is available in Site Editor and editable widgets can be placed upon it. It has the non-removable Analytics widget on the page, which implements the same charts that can be accessed from the Challenge Overview page: Visitors, Ideas, Votes, Views, Comments, and Ideas per Stage.

Prior to 4.3, it contained the suggested widgets below, which have all been removed from the product as of the 4.3 Release:

1. Category Activity (sector_activity)
2. Idea Stages (idea_stages)
3. Idea Breakdown by Category (idea_breakdown)
4. Posts Per Day (posts_per_day)
5. Views Per Day (views_per_day)
6. New Users Per Day (signups_per_day)
7. Most Active Users by Week (hot_users)
8. Most Popular Ideas (most_popular_ideas)

Page: AppHome

Suggested widgets are in red below. The other widgets below appear on the dropdown.

Widget Name 1	Widget Name 2
Activity	activity_stream_home
Challenges	site_challenge_lists
	editable_widget1-95
Display Content with Title	editable_widget59
Trending	trending_ideas

Page: Auction

Contains the suggested widgets below:

1. Auction (view_auction)
2. Auction History (auction_past)
3. Auction Control (auction_control)
4. Auction Administrator (auction_admin)
5. Spigit Administrator (user_stats)

And on the widget dropdown, the "Complete Widget List" on page 6.

Page: Dashboard

This page uses a template that does not have any page areas to which widgets can be added.

Page: Home

There are no selected widgets, except for editable_widget64 whose content is "Headlines".

Appearing on the dropdown are the "Complete Widget List" on page 6.

Widgets Alphabetically

Page name given below for each widget is the Page within the Challenge Community (CC) or non-Challenge Community (NCC) where the widget is suggested.

Activity Widget (formerly named Activity Feed)

WidgetName1:	Activity
WidgetName2:	activity_stream_home
Page:	On dropdown (not pre-selected) on Home (CC & NCC). Suggested on MyProfile (NCC), UserProfile (CC & NCC). Suggested for AppHome (NCC). On dropdown for SiteChallenges (NCC).
Description:	Displays a list of the site activities in the current community and all child challenge communities grouped by My Stuff, My Following and All views

(formerly know as) Activity Widget (deprecated)

WidgetName1:	Activity
WidgetName2:	useractivity
Page:	
Description:	Displays a list of the member's activities in user's profile.

Activity Stream Banner Widget

WidgetName1:	Activity Stream Banner
WidgetName2:	activity_stream_banner

Page:	Widgets (NCC).
Description:	Displays a feed on the Activity page. (Activity page deprecated in 4.3 Release.)

Add Store Item Widget

WidgetName1:	Add Store Item
WidgetName2:	add_store_item
Page:	Store
Description:	Set of fields needed to add a new item to the store.

Administrator Home Widget

WidgetName1:	Administrator Home
WidgetName2:	admin_home
Page:	Admin Home
Description:	Links to the various administrative functions of the site. Accessible only to users assigned the Admin role.

All Blogs Widget

WidgetName1:	All Blogs
WidgetName2:	aggregated_blogs
Page:	AllBlogs page (CC & NCC). Needs association from the _ blog page. If page lacks association, defaults to blog of user who is logged in.

Description: Aggregate view of most recent blog posts in the community, for all authors.

All Blogs Widget

WidgetName1:   All Blogs

WidgetName2:   aggregated_blogs

Page: AllBlogs page (CC & NCC). Needs association from the _ blog page. If page lacks association, defaults to blog of user who is logged in.

Description: Aggregate view of most recent blog posts in the community, for all authors.

Analytics Widget

WidgetName1:   Analytics

WidgetName2:   analytics

Page: Analytics page (non-removable)

Description: Implements the same charts that can be accessed from the Challenge Overview page: Visitors, Ideas, Votes, Views, Comments, and Ideas per Stage.

Auction Widget

WidgetName1:   Auction

WidgetName2:   view_auction

Page: Suggested on Auction page (CC & NCC)

Description: Displays the information about an auction.

Auction Administrator Widget

WidgetName1:   Auction Administrator

WidgetName2:   auction_admin

Page: Suggested on Auction page (CC & NCC).

Description: Displays the Admin options for an auction.

Auction Control Widget

WidgetName1:   Auction Control

WidgetName2:   auction_admin

Page: Suggested on Auction page (CC & NCC).

Description: Shows the options to subscribe to and view the history of an auction.

Auction Delivery Options Widget

WidgetName1:   Auction Delivery Options

WidgetName2:   auction_del_inst

Page: On dropdown of Auction page.

Description: Displays the delivery information and options for an auction.

Planview Spigit Widget Guide for Administrators

Auction History Widget

WidgetName1:   Auction History

WidgetName2:   auctions_past

Page: Suggested on Auction page (CC & NCC)

Description: Displays past auctions.

Auction Stats Widget

WidgetName1:   Auction Stats

WidgetName2:   auctions_history

Page: On dropdown of Auction page (CC & NCC)

Description: Shows the history and other statistics of an auction.

Authorized Applications Widget

WidgetName1:   Authorized Apps

WidgetName2:   authorized_apps

Page: Not suggested, but on many dropdowns for NCC & CC.

Description:

Best Overall Widget

WidgetName1:   Best Overall

WidgetName2:   predictions_best_overall_detail

Page: PredictionResults (CC).

Description: "Best Overall" ideas are calculated using a combined measurement, approximately equal to (revenue - cost) / time.

Best Overall Predictions Widget

WidgetName1:   Best Overall Predictions

WidgetName2:   predictions_bang_for_the_buck

Page: Predictions (CC)

Description: (revenue - cost) / time

Bid History Widget

WidgetName1:   Bid History

WidgetName2:   auction_bid_history

Page: On dropdown of Auction page (CC & NCC).

Description: Displays the bid history of an auction.

Biography Widget (renamed Details)

WidgetName1:   Details

WidgetName2:   user_profile_biography

Page: MyProfile (CC & NCC) page

Description: Displays member's biography and resume information in user's profile.

Planview Spigit Widget Guide for Administrators

Blog Administrator Page Widget

WidgetName1:	Biography
WidgetName2:	blog_settings
Page:	On dropdown menu of AllBlogs and ViewBlog pages (CC & NCC).
Description:	Displays the Admin blog settings.

Blog Comment Widget

WidgetName1:	Blog Comment
WidgetName2:	post_blog_comment
Page:	Only works when accessed by clicking either (1) Reply link below another blog comment, or (2 Reply button on aggregated list of blog posts. On dropdown menu of AllBlogs and ViewBlog pages (CC & NCC).
Description:	Page to add a comment to a blog post.

Blog Control Panel Widget

WidgetName1:	Blog Control Panel
WidgetName2:	blog_control_panel
Page:	On dropdown for AllBlogs &ViewBlog (CC & NCC). Only works on a user's blog page, or on an individual blog entry.
Description:	For each blog owner, provides links to post new entries, view drafts, edit blog settings, moderate posts and manage spam.

Blog List Widget

WidgetName1:	Blog List
WidgetName2:	blog_archival
Page:	On dropdown for AllBlogs &ViewBlog (CC & NCC).
Description:	Provides a list of all the site blogs by month and year.

Categories Widget

WidgetName1:	Categories
WidgetName2:	categories

Trading Leaderboard Matrix Widget

WidgetName1:   Trading Leaderboard Matrix

WidgetName2:   idea_market_electronic

Page: On dropdown of Leaderboard page (CC & NCC)

Description: Displays the Idea Market Electronic Chart.

Trending Widget

WidgetName1:   Trending

WidgetName2:   trending_ideas

Page: On dropdown of Predictions page (CC).

Description: The Trending widget displays a list of the top ideas ranked by trending score. The trending score enables you to monitor which ideas in the current community and child challenge communities are receiving the most trend activities. Trending score is based on the amount of idea activity, such as positive votes, comments and shares, that an idea receives. Trending scores are refreshed hourly (plus a brief processing interval), based on the system time. Each user's votes, comments and shares are only counted once per idea. Note: Older ideas with a high trend score are granted a slight trending preference over newer ideas. For trending with both old and new ideas, this helps to smooth the trend rating of ideas over the period of a challenge.

User Advanced Search Widget

WidgetName1:   User Advanced Search

WidgetName2:   user_admin_fresh

Page: On the dropdown of some pages.

Description: Displays the Admin settings for managing users. Border is required.

Users by Wealth Widget
