

Changepoint 2021

Mobile App 3.00.053 Patch Release Notes

Release date

March 9, 2021

Fixed issues

- Total hours in time calendar are not properly displayed on some phone text and display size settings
- Request time entries entered on the last date of the week are displayed in the mobile app only if the start time is 12:00AM
- Removed the Trash icon for submitted time cards and pinned items in time sheet
- Unable to pin an open task item when the signed-in user has not previously entered time for the task
- Time code dropdown list is not sorted in alphabetic order
- iOS only – Page title appears twice in Expense, Time sheet and Time Approval pages
- iPad only – Swiping right on a time card opens the main menu
- Missing **Back** button in **Select Expenses** page accessed from a draft expense report and **Tasks** page accessed from the **Notifications** screen
- Expense – **Cancel** button is cut off in the **Change Reason** pop-up when updating an expense for which the associated contract has auditing enabled
- Android devices only - Changepoint icon appears as a white box in the notification status bar on some devices

For information about using the mobile app, see the *Mobile App Quick Start Guide*, which is available from the Changepoint community (<https://support.changepoint.com>) and team folders.

Applies to

Changepoint 2020

Changepoint 2017, 2017 SP1, 2017 SP2

Caveats and known issues

- Some messages in the **Notifications** page are not properly refreshed. You can refresh the notification messages by doing either of the following:
 - On the **Notifications** page, swipe down
 - On the **Settings** page, tap “Refresh Application Data.”
