Release date

January 29, 2012

Fixed issue description

Export publishing service schedule is not set correctly.

Changes to the product architecture and technology matrix

N/A

Technical details

Installing the patch manually

Note: This update has a dependency on General patch 19.00.119.000, 19.00.121.000 and 19.00.136.000, which must be installed before installing this update.

1. Stop the following services:

   a) Changepoint Communication Dispatcher Service

   b) Changepoint DataMapper Service

   c) Changepoint Export Publishing Service

2. Uninstall the services using the Windows Control Panel:

   Changepoint Export Publishing Service

3. Install the following services from the patch package:

   Changepoint Export Publishing Service

4. For the Changepoint Export Publishing service

   a) use the `LoginSettings.exe` utility to configure the database connection for it.

   b) open the configuration files, and replace the hostname value with the FQDN of the machine running the RabbitMQ service, as follows:

   ```
   <!-- Message Broker specific app settings for messaging connections ->
   <add key="MessageBroker.HostName" value="amqps://hostname"/>
   ```

5. Start the following services:

   a) Changepoint Communication Dispatcher Service

   b) Changepoint DataMapper Service

c) Changepoint Export Publishing Service

6. Open SQL Management Studio and execute `1900139000.sql` against the Changepoint database.

Caveats and notes

If you have Integration Framework with resource location field mapping in transformation file, you must apply the Changepoint API January Release, and update the transformation file.

Dependencies and overrides

The following patch must be applied prior to this release in the specified order:

	Patch
1	19.00.119.000
2	19.00.121.000
3	19.00.136.000

The following release will be overwritten by this patch:

None.

New or changed files

	Release files
1	Export Publishing Service Installer

Changepoint Product Extensions

Product extensions include any code that has been added, modified or customized in any way. It is strongly recommended that customers who deploy Changepoint product extensions in their Staging, Test/QA or Production Environments, review the list of files in the "**New or Changed Files**" section of this patch, to assess whether there is any impact.

Changepoint Customer Enablement should be contacted prior to applying this release if any of the code associated with the product extension is deemed to be at risk. Failure to do so may result in the files being overwritten or deleted and the extended functionality failing.
