

# Changepoint 2020

## 19.00.135.000 Analytics General Patch Release Notes

### Release date

November 30, 2020

### Fixed Issues

Product Area	Customer Tracking Number	Changepoint Internal Tracking Number	Fixed Issue Description
Cognos		CPC-2020-01228	Sender's name not displaying properly when an email delivery option is selected.
Cognos		CPC-2020-01236	Profile link(legacy) column in a report does not link to the profile for the entity.

### Upgrade instructions and additional information

1. On the Cognos App Tier server, launch IBM Cognos Configuration, and click the Stop button to stop the IBM Cognos service.
2. Copy the ChangepointCAP.jar file from the patch folder  
Cognos\Analytics\webapps\p2pd\WEB-INF\lib to  
**%programfiles%\ibm\cognos\analytics\webapps\p2pd\WEB-INF\lib** folder.
3. Copy the files from patch folder of Cognos\Analytics\webcontent to  
**%programfiles%\ibm\cognos\analytics\webcontent** folder.
4. Start the IBM Cognos service and then exit IBM Cognos Configuration.
5. Advise users to sign out of Changepoint, and clear the browser cache.
6. Open SQL Server Management Studio with sufficient rights:
  - Execute 1900135000a.sql against the ContentStore database.
  - Execute 1900135000b.sql against the Changepoint database.

## Caveats and notes

1. If an email delivery method is used for a report, the name of the user sending the report is automatically added to the **Recipients** field. However, the name is not a valid email address and will result in an undeliverable email. To correct this issue you must remove the name from the **Recipients** and **Senders** fields, and then select the correct name or enter a valid email address.

## Dependencies and overrides

The following patches must be applied prior to this patch in the specified order:

	Patch
1	19.00.133.000

The following release patches will be overwritten by this patch:

None.

## New or changed files

	Website files
1	ChangepointCAP.jar
2	Cognoslaunch.js
3	ProfileLink.js

## Changepoint Product Extensions

Product extensions include any code that has been added, modified, or customized in any way. It is strongly recommended that customers who deploy Changepoint product extensions in their Staging, Test/QA, or Production Environments review the list of files in the “New or changed files” section of this patch, to assess whether there is any impact.

Changepoint Customer Enablement should be contacted prior to applying this patch if any of the code associated with the product extension is deemed to be at risk. Failure to do so may result in the files being overwritten or deleted and the extended functionality failing.
