Upgrade instructions and additional information

1. Using the instructions in the *Changepoint Installation Guide*, do the following:
 - a) Import the base data model (model.zip).
 - b) Add customized field labels and configurable fields to the data model.
2. Upgrade the database:
 - a) Open SQL Management Studio with sufficient rights.
 - b) Execute 1802128000.sql against the **Changepoint** database.
3. Send an email to advise report creators to open each of their reports in Report Studio, and then follow the prompts to accept the changed package.

Caveats and notes

N/A.

Dependencies and overrides

The following patches must be applied prior to this patch in the specified order:

	Release version

The following release patches will be overwritten by this patch:

None.

New or changed files

	Package files
1	Model.zip
2	Model_ITD.zip

Changepoint Product Extensions

Product extensions include any code that has been added, modified, or customized in any way. It is strongly recommended that customers who deploy Changepoint product extensions in their Staging, Test/QA, or Production Environments review the list of files in the “New or changed files” section of this patch, to assess whether there is any impact.

Changepoint Customer Enablement should be contacted prior to applying this patch if any of the code associated with the product extension is deemed to be at risk. Failure to do so may result in the files being overwritten or deleted and the extended functionality failing.
