## Installation and upgrade instructions

For complete information on installing or upgrading to Changepoint 2017 SP1, see the *Changepoint Upgrade Guide*.

## System Requirements

### Software

For a complete list of the supported software configurations, see the Changepoint 2017 SP1 *Product Architecture and Technology Matrix*.

### Hardware

For a list of recommended hardware configurations, see the *Changepoint Hardware Recommendations Release 2017 SP1*.

## New and changed functionality

For a complete list of the new and changed functionality in Changepoint 2017 SP1, see the *Changepoint 2017 SP1 What's New* document in the *2017 SP1 Product Information Portal Access* team folder.

## Changepoint media

The Changepoint media contains the following:

- Core Changepoint installer, related files and tools
- Online help files in English only. The French and German online help will be released at a later date.

## Release and product documentation

The release and product documentation are available from the following sources:

- *2017 SP1* category on the Changepoint Product Help Center (<https://support.changepoint.com>).
- *2017 SP1 Release Notes and Patches* team folder in Changepoint through the Client Portal
- your Changepoint customer representative

### Release documentation

The following release documentation is available in English only.

- *Release Notes*
- *Caveats and Known Issues Reference*
- *Changepoint Installation Guide*
- *Changepoint 2017 SP1 Product Architecture and Technology Matrix*
- *Changepoint Hardware Recommendations Release 2017 SP1*

### Guides updated for this release

The following guides were updated for this service pack and are available in English only for this release. The guides are available in PSA and PPM versions.

- *Changepoint Administration Guide*
- *Changepoint-Cognos Data Model Reference*
- *Resource Management User Guide*

- *Security Access Reference*
- *Time and Expense Management User Guide*
- *User Basics User Guide*

## Changes to the product documentation set

The *Changepoint-Cognos Data Model Reference Guide* has been renamed the *Changepoint-Cognos Reference Guide*. It includes information that is specific to using Cognos Analytics in Changepoint, and the Changepoint-Cognos Data Model.

## Upgrade considerations and notes

This section briefly describes the changes that are of particular importance to customers who are upgrading from a previous version of Changepoint.

**Note:** The complete details for upgrading are in the *Changepoint Upgrade Guide*.

### Upgrade paths

You can upgrade to Changepoint 2017 SP1 from Changepoint 2017 only.

You can also install a new Changepoint 2017 SP1 environment.

### Upgrade notes for installing Cognos Analytics

- Cognos Analytics 11 is a major release and requires a reinstall.
- The Cognos gateway server is no longer required. Only the Cognos application tier is required. The Changepoint installer removes the gateway server during the upgrade.

#### *Changes to security features*

- The names and descriptions of security features related to the resource management worksheet were changed to include the resource scheduling worksheet.
- *Cognos Business Author* and *Cognos Professional Author* security features both include the same access to create or edit reports and other Cognos items using **Create Report** or **Create Dashboard**.

### Upgrade notes for using Cognos Analytics:

- The Cognos Analytics 11 user interface is very different from the Cognos 10.x user interface. Users will need to familiarize themselves with the new interface. The same functionality and options are available, but many of them are in a different location in the new interface.

- Adding links from reports to Changepoint profile pages uses a different methodology for interactive reports, which are new in Cognos Analytics 11. For more information, see the *Changepoint-Cognos Reference Guide*.

## Product retirement

### Report Designer

In response to customer feedback, Report Designer will continue to be on limited support in the Changepoint 2017 release. No functional enhancements will be made, and only critical defects will be addressed for Report Designer. We reserve the right to discontinue support for Report Designer if browser technologies change such that it becomes impossible to support without significant effort.

Changepoint 2017 will be the last major release that supports Report Designer. Customers are encouraged to begin transitioning to the IBM Cognos reporting functionality that was introduced in Changepoint 2012 SP1.

The strategic partnership with IBM was undertaken to deliver best-of-breed business intelligence capabilities seamlessly integrated within the Changepoint solution. It will enable customers to leverage world class, sophisticated business intelligence functionality to deliver rich and dynamic reporting content to their users.

Customers can take advantage of the Cognos accelerator report packages, which contain close to 200 reports covering a wide range of data and formats, free of charge.

Contact your Changepoint representative for more information about the Cognos reporting package and about the services packages that are available to assist customers in getting the best out of the Cognos solution.

### ASP-based reports and portlets

The ASP-based reports and portlets will be on minimum support for Changepoint 2017 and will be sunset in future releases. No functional enhancements will be made, and only critical defects will be addressed. Customers are encouraged to leverage the Cognos reporting solution as an alternative. The Cognos accelerator package contains replacement reports for almost all of the existing ASP-based reports.

### COM API

The COM API is supported in Changepoint 2017 but will be phased out in a future release. Customers should use the web services API or WCF API for new development and make plans to transition existing customizations to the web services or WCF API.

## Fixed issues

Product Area	Request number	Fixed issue description
APIs	CPC-2017-00546	Updating an engagement through the API deletes fixed fee schedule items.
APIs	CPC-2017-00769	Carriage return in configurable text field becomes encoded when adding an entity via the Integration Framework.
APIs	CPC-2017-01246	Unable to set OverrideTaskRestriction flag on Engagement entity to true. Unable to set a Task as open task with CreateByXml method for ApiProject.
Architecture	CPC-2017-00292	Resource demand calculation job failed at step 4 (Replace past with actuals) with error "Violation of PRIMARY KEY constraint 'PK_BudgetFixedFeeSchedule'".
Architecture	CPC-2017-00317	Resource Demand Calculation job does not process budgets locked by the job due to previous failures.
Architecture	CPC-2017-00771	CPFullText job fails on the environment with Always On configured.
Architecture	CPC-2017-00790	Financial Analysis Summary job failed at step 4 when both type 17 and 29 were disabled.
Architecture	CPC-2017-00847	Improved performance for Validate UDFs job.
Architecture	CPC-2017-00887	Replace past with actuals process does not calculate the actuals for budget services that have "Allow replace past" disabled.
Architecture	CPC-2017-00902	Validate UDFs job failed if resource configurable field is configured with formula.
Architecture	CPC-2017-01460	Resource Demand Calculation job failed in step 3 RollupProjectsByFiscalPeriods, when there are sub-tasks and the sub-tasks have long span of duration.
Architecture	CPC-2018-00035	Project fiscal distribution records are lost after Resource Demand Calculation job fails.
Architecture	CPC-2018-00071	Recreate CPTempDB does not correct the wrong permission set for the database.
Architecture	CPC-2018-00073	Improved performance when running Financial Analysis Summary job.
Architecture	CPE-2017-00432	Cannot save or apply budgets with latest update for Chrome.

Product Area	Request number	Fixed issue description
Architecture	CPE-2017-00437	Resource Demand Calculation job failed with step 4, replace past with actual, if multiple materials were created for the project, and the materials have the same product and engagement product selected.
Architecture	CPE-2017-00538	Changepoint_CPEExtended_Compile stats and purge data job fails with error.
Architecture	CPE-2017-00565	RD job failed with step 4 BU_ReplacePastWithActuals error: Violation of PRIMARY KEY constraint "PK_BudgetProductFiscalRollup"
Billing	CPC-2017-00570	Rounding for exchange rate is different on expense report than billing
Billing	CPC-2017-01088	The "Remit to" address is not aligned properly when the invoice is printed.
Billing	CPC-2018-00011	Draft Invoice Message is not removed from the General Invoices with Invoice Status in Pending approval or Approved after submitted from Batch Invoicing Processes.
Billing	CPC-2018-00126	User cannot commit a credit note.
Budgeting	CPC-2017-00350	Calculate actuals process does not bring actuals in budget services when "Allow replacement of past values with actual values" is not selected.
Budgeting	CPC-2017-00583	Error when saving an engagement product added from Create or Edit Material dialog.
Budgeting	CPC-2017-00652	Updated On and Updated By fields for a budget item are not populated when the Copy To field for the budget item is updated when a new revision is created.
Budgeting	CPC-2017-00843	Calculate Actuals process for budget services does not respect the "Exchange rate date for actual values" setting.
Budgeting	CPC-2017-00956	Negative time adjustment amounts are not included for budget services when doing calculate actuals or replace past with actuals.
Cognos	CPC-2017-01184	Performance improvement for CognosResourceDemand view.
Engagements	CPC-2017-00976	On engagement, the field value for 'Maximum recognizable revenue for time and expenses' is not being calculated correctly when multiple products have the same Negotiated price.

Product Area	Request number	Fixed issue description
Engagements	CPC-2017-01307	"Copy Standard Rates" on engagement does not work when Display option is set to Inline for Engagement.
Engagements	CPC-2017-01352	Improved performance when saving an engagement.
Engagements	CPC-2017-01490	Override task restriction check box on engagement does not respect metadata setting 'Field is not editable once the initial value has been saved'.
Exchange Server synchronization	CPC-2017-00717	Exchange sync issue when syncing new resource that has a recurring item with no end date specified.
Exchange Server synchronization	CPC-2018-00065	Calendar entries are not synchronized between Changepoint calendar and Outlook calendar because of time out.
Expense Entry	CPC-2017-00800	Batch expenses approval approves expense reports without considering the threshold approval and finance approval defined for the resource's workgroups.
Expense Entry	CPC-2017-00893	Improved performance when user clicks 'View expense reports' from expense creation page.
Expense Entry	CPC-2017-01486	User is unable to save an expense when a configurable field has conditional settings on the expense type field.
Expense Entry	CPC-2018-00249	User gets an erroneous message "The Recoverable Tax is not editable and cannot be changed" when saving an expense.
General Usability	CPC-2017-00727	Opening a type-ahead drop-down requires two clicks.
Installation	CPC-2017-00624	Cognos Sync Utility installation does not place an icon on Start menu if the sync utility was installed previously on the same client.
Installation	CPC-2017-00736	Cognos Sync Utility freezes when .NET Framework 4.6.2 is not installed.
Installation	CPC-2017-00781	Provided capacity to reset connection settings on InfinitiDB using the Login Settings.exe, and select Intelligent Forms Database Setup, when porting InfinitiDB from one server to a different server.
Installation	CPC-2017-00791	Upgrading general patch on Archiving database fails when CPFullText is not enabled on archiving database.

Product Area	Request number	Fixed issue description
Intelligent Forms	CPC-2017-00507	Error when adding a data source by selecting Connection Type equals to Changepoint: "Unable to open connection to data source. There was an error downloading <a href="http://xxx.changepont.com/Infiniti/ChangepointDataService/Changepointdata.asmx">http://xxx.changepont.com/Infiniti/ChangepointDataService/Changepointdata.asmx</a> ."
Intelligent Forms	CPC-2017-00559	Error when deleting a partially saved form in Intelligent Forms In Progress Portal
Intelligent Forms	CPC-2017-00990	Object Type does not show in Infiniti Manage>Data Sources>Edit Data Source>Data objects page
Intelligent Forms	CPC-2018-00015	Knowledge item attachments get corrupted when added from Intelligent Forms documents.
Intelligent Forms	CPC-2018-00020	Unable to use a custom type URL to launch an Intelligent Form.
Intelligent Forms	CPE-2018-00064	Intelligent Forms does not work on Single Sign-on environment, if ChangepointDataService is used for data source connection.
Misc.	CPC-2017-00673	Error when launching eLearning basic lessons for Intelligent Forms.
Misc.	CPC-2017-00774	Error "Server Error in '/' Application. Object reference not set to an instance of an object" when signing into Changepoint, when there is an invalid node '< div />' in RecentAccessXml saved in RecentAccess table
Misc.	CPC-2017-00832	User could randomly encounter an error when signing into Changepoint if there is incorrect data in the VersionHistory table.
Misc.	CPC-2017-01171	Date format for fixed fee date does not conform with the language selected on the browser.
Misc.	CPC-2017-01483	User gets a white blank page when sending survey reminder to Outstanding respondents in Survey Management portal.
Misc.	CPint-2017-00364	Survey doesn't show response information when launched from Survey portlet.
Portfolio Planning	CPC-2017-01500	Budget Schedule metrics does not return data after the Portfolio Calculation Engine job is run when revision type is used on the metric, or on the budget.

Product Area	Request number	Fixed issue description
Portfolio Planning	CPC-2018-00022	Warning 'The maximum key length is 900 bytes. The index 'ix_1' has maximum length of 1152 bytes....' on Portfolio Calculation Engine job.
Project Management	CPC-2016-04200	Actual finish date is set for active projects when there are completed tasks in the project.
Project Management	CPC-2017-00672	Successor task dates are not moved when updating predecessor except the immediate successor
Project Management	CPC-2017-00675	Project planning worksheet and project worksheet cannot be displayed due to erroneous TaskAssignment records with NULL in PlannedHours field generated by running Resource Demand Calculation job.
Project Management	CPC-2017-00775	Successor task date is not moved when deleting task assignment causing the predecessor task date change.
Project Management	CPC-2017-00805	'Include in resource demand' should be true by default for new tasks or assignments in PPW.
Project Management	CPC-2017-00846	Associated activities cannot be sorted on a project.
Project Management	CPC-2017-00945	ResourceId in TaskAssignment, ProjectTeam and ProjectedResources records are not updated after Resource Request is re-opened and assigned to a different resource
Project Management	CPC-2017-00980	Improved performance when loading a project profile.
Project Management	CPC-2017-01012	'Utilization eligible' field does not default to 1 when the task is billable
Project Management	CPC-2017-01050	Planned hours is set to the same as actual hours on the project when the Resource Demand Calculation job is run if the assignments have loading method 1 (update past and future).
Project Management	CPC-2017-01110	Users can delete project team records associated with resource requests that are not in canceled statuses, which causes data issues.
Project Management	CPC-2017-01165	Forecast start, forecast finish, and remaining effort are not updated when updating planned effort in daily or fiscal period periods.
Project Management	CPC-2017-01181	CSLA validation fails when user updates planned start or planned finish for 'status not required' assignments.

Product Area	Request number	Fixed issue description
Project Management	CPC-2017-01303	Subtask actual start and finish dates are cleared when completing the summary task after switching views.
Project Management	CPC-2017-01353	Inconsistent next status date on task profile page, when the next due date is today.
Project Management	CPC-2017-01390	Summary task managers are not able to create assignments for a subtask under the summary task.
Project Management	CPC-2017-01474	Error when exporting to Excel in Project Worksheet and Project Planning Worksheet.
Project Management	CPE-2017-00384	Task Assignment created in Task edit page has incorrect WorkgroupId (same value as GlobalWorkgroupId) when user launches and saves changes in "Select resources" dialog from Assignment section.
Project Planning Worksheet (PPW)	CPC-2017-00486	Dates for successor tasks that have assignments are not moved if they are not in the current view. Ensure no filters are applied if the project has dependencies to allow the dates to be moved correctly.
Project Planning Worksheet (PPW)	CPC-2017-00488	Completing a task assignment by changing the percent complete or remaining hours in a task assignment view will not complete the task or its summary or child tasks. Use the task view to complete the task if only one assignment exists or if all assignments are complete.
Project Planning Worksheet (PPW)	CPC-2017-00563	Unassigned resources who have already been assigned to a task should be displayed and editable in PPW.
Project Planning Worksheet (PPW)	CPC-2017-00671	Updating effort in 'Assign resources' dialog does not update the total planned hours for the task.
Project Planning Worksheet (PPW)	CPC-2017-00743	Blank displayed in PPW after copying a task and switching to a view with a configurable field that has default value.
Project Planning Worksheet (PPW)	CPC-2017-00745	Webpage error after making an edit and then clicking refresh on PPW.
Project Planning Worksheet (PPW)	CPC-2017-00782	PPW record lock released by 'Release held locks' scheduled job while the worksheet is still open in edit mode.

Product Area	Request number	Fixed issue description
Project Planning Worksheet (PPW)	CPC-2017-00806	Unable to save PPW after adding a resource to a task that contains a calculated configurable field (on a task view).
Project Planning Worksheet (PPW)	CPC-2017-00835	Task planned finish date defaults to 1969 in PPW when the related engagement staffing workgroup has been deleted.
Project Planning Worksheet (PPW)	CPC-2017-00962	JavaScript error occurs when updating a task that contains an assignment assigned to a deleted resource in PPW.
Project Planning Worksheet (PPW)	CPC-2017-00991	Resource daily capacity is not considered in PPW for new assignments when planning unit is setup to days
Project Planning Worksheet (PPW)	CPC-2017-01144	Billing Rate and Cost Rate are not displayed for assignments of draft tasks in PPW.
Project Planning Worksheet (PPW)	CPC-2017-01174	Changes to task name are not saved in PPW.
Project Planning Worksheet (PPW)	CPC-2017-01196	Users are not able to delete the value in billing role column in PPW.
Project Planning Worksheet (PPW)	CPC-2017-01201	Project team validation is bypassed in PPW when activating a task assigned to a resource who has an unchanged task assignment in the project.
Project Planning Worksheet (PPW)	CPC-2017-01204	Actual finish date is not set when task assignment percent complete is set to 100% in PPW.
Project Planning Worksheet (PPW)	CPC-2017-01242	JavaScript error in PPW when clicking "Validate change" button against assignment with deleted resource.
Project Planning Worksheet (PPW)	CPC-2017-01304	Assigning resources to a completed task does not clear the task actual finish date.
Project Planning Worksheet (PPW)	CPC-2017-01333	Effort distributions are not moved to the new dates after replacing resources.

Product Area	Request number	Fixed issue description
Project Planning Worksheet (PPW)	CPC-2017-01367	Summary task managers cannot create a new subtask when they are also project viewers.
Project Planning Worksheet (PPW)	CPC-2017-01375	Effort distributions are not using the updated planned effort after replacing resources using assign task dialog.
Project Planning Worksheet (PPW)	CPC-2017-01383	Rounding problems when using automatic percentage distribution in Assign/Replace Resources dialog.
Project Planning Worksheet (PPW)	CPC-2017-01384	Calculation of distribution in Assign/Replace Resource dialog should precise to 3 decimal places.
Project Planning Worksheet (PPW)	CPC-2018-00033	Cannot launch Project Planning Worksheet when the FixedFee list option is concatenated and consists of more than 255 characters.
Project Planning Worksheet (PPW)	CPC-2018-00079	An error occurs when updating assignment planned finish date for the predecessor task in project planning worksheet.
Project Planning Worksheet (PPW)	CPC-2018-00114	Task names are changed to 'not accessible' after the summary task manager updates the subtask dates and hours in project planning worksheet.
Project Planning Worksheet (PPW)	CPC-2018-00285	Update tasks in PPW set the ConversionToDay value to 1 for the related project team records.
Project Planning Worksheet (PPW)	CPE-2017-00285	"Add to Calendar" field is not automatically selected in PPW although it's set to mandatory in Metadata.
Project Planning Worksheet (PPW)	CPE-2017-00330	Alert 'An error occurred.' appears when refreshing Resource Demand Scenario histogram after updating demand items on the Gantt chart.
Project Planning Worksheet (PPW)	CPE-2017-00340	"Go to the selected date" on calendar does not interpret the date correctly when browser language is set to "English UK".
Project Planning Worksheet (PPW)	CPE-2017-00392	Some page contents for the project planning worksheet are only available in English.

Product Area	Request number	Fixed issue description
Project Planning Worksheet (PPW)	CPE-2018-00029	Cannot save Project Planning Worksheet due to infinite loop when validating task dependencies.
Project Planning Worksheet (PPW)	CPE-2018-00048	Project cannot be opened in PPW when the billing role associated with the task was deleted.
Project Planning Worksheet (PPW)	CPE-2018-00107	Error while expanding an active task in project worksheet when there are draft tasks.
Project Worksheet	CPC-2017-00511	Manual effort distribution is overridden after clicking 'Calculate Remaining Effort and percent complete' in project worksheet.
Project Worksheet	CPC-2017-00762	Manually allocated effort is automatically redistributed after saving the project worksheet.
Reports	CPA-2017-00006	"Batch Time and Expense Approval" report does not return data when run from My Favorite Reports portal.
Reports	CPC-2014-09407	Expense Reports by Status report errors out if the selected resources are from multiple workgroups.
Reports	CPC-2017-00622	Earned value report does not show correct data for ToDateActualCost if the project has summary tasks.
Reports	CPC-2017-01067	Error when rejecting 'All selected records' through Batch Time and Expenses Approval report.
Reports	CPC-2017-01197	Error on Budget Details report run with the option "Engagement and project, by budget item" and "All" in project list in the report criteria.
Reports	CPC-2017-01262	Task Status Compliance reports do not have a link for tasks when the report is accessed from My Favorite Reports and the user is the project manager.
Reports	CPE-2018-00002	"Error 500" occasionally occurs during report scheduling set up.
Resource Management	CPC-2017-00307	ResourceNonWorkingDays table is not populated correctly for the resources that were assigned and unassigned on the same day.
Resource Management	CPC-2017-00598	Changepoint.LegacyInterface error when clicking Go on the Resource Scheduling screen.
Resource Management	CPC-2017-00642	Resource Demand Scenario cannot be launched from scenario comparisons worksheet.

Product Area	Request number	Fixed issue description
Resource Management	CPC-2017-00682	Right-clicking "View calendar" from Resource Scheduling opens resource calendar in the current month, instead of the month selected on the Resource Scheduling screen.
Resource Management	CPC-2017-00767	Assigned resource field on resource request cannot be changed when an existing task assignment is mapped to multiple resource requests.
Resource Management	CPC-2017-01377	Resource history scope displays the internal field names instead of the correct configurable field labels.
Resource Management Worksheet	CPC-2016-02348	Inconsistent behavior when deleting multiple predecessor tasks or deleting dependencies
Resource Management Worksheet	CPC-2017-00494	An error was logged in event viewer when user replaces an assignment in Resource Management Worksheet.
Resource Management Worksheet	CPC-2017-00526	Error "ReplaceReassignDemandItems: An item with the same key has already been added." error when demand items are reassigned in RMW.
Sales/ Opportunities/ Candidates	CPC-2017-00329	Functions field is cleared when the user clicks the currency column on opportunity services.
Sales/ Opportunities/ Candidates	CPC-2017-01130	Error: "There was a problem retrieving data from the server" appears when working with Candidate resource plan (Opportunity>Services) sheets, for example scrolling all the way to the bottom of the item list when there are 66 or more line items.
Sales/ Opportunities/ Candidates	CPC-2017-01522	Error "SaveFilter: Value was either too large or too small for an Int32" when saving a filter in scenario comparisons worksheet if the filter was created on a numeric field and the value exceeds 214748.
Sales/ Opportunities/ Candidates	CPE-2017-00477	The fixed fee amounts entered in the opportunity dialog are not always saved.
Sales/ Opportunities/ Candidates	CPE-2018-00007	Improved performance loading Scenario Comparisons due to access checking for configurable fields.
Sales/ Opportunities/ Candidates	CPC-2017-00711	Missing request type from type drop-down when editing a request whose type was deactivated for Enterprise use on the engagement processing rules.

Product Area	Request number	Fixed issue description
Support Desk / Requests	CPC-2017-01022	User is able to change the support desk when copying a request, even though the “Allow support desk override” is not selected on the engagement.
Support Desk / Requests	CPC-2018-00026	Able to copy and save a request with a request type that is not available for Changepoint users.
Support Desk / Requests	CPE-2018-00114	Associated entity fields are not prepopulated when creating a request from project budget items using a request template.
System Administration	CPC-2017-00579	Approved time is not considered as actual when TimeControl is set to Submitted.
System Administration	CPC-2017-00726	Multi-select configurable field conditional values drop-down list does not respect its trigger conditional formula in PPW.
System Administration	CPC-2017-00741	User cannot edit requests when Edit access rights are set on workgroup, and the user belongs to the workgroup.
System Administration	CPC-2017-00804	Conditional value for configurable field is not respected.
System Administration	CPC-2017-00826	User with "Edit information in past fiscal periods" feature cannot delete tasks with planned finish date in a past fiscal period.
System Administration	CPC-2017-01058	Resource was assigned to "Reports to", "Time approver" and “Expense approver” but did not appear on the Organizational information section in User Setup.
System Administration	CPC-2017-01158	Error: "The formula may contain illegal fields or strings, or syntax errors. It cannot be saved." when saving a formula in a calculated configurable field, if the formula comes from a custom stored procedure.
System Administration	CPC-2017-01185	System-level closed period is not enforced for time records from a billing office that has an expired closed period.
System Administration	CPC-2017-01214	Incorrect payroll lag calculation for weekly-based pay schedule.
System Administration	CPC-2017-01520	User is unable to create custom language string for a new PCID from User Interface in Changepoint Administration.
System Administration	CPC-2018-00088	Project configurable fields (shared from resource) do not appear in scenario comparisons worksheet.
System Administration	CPE-2017-00341	SQL server windows event log does not contain custom configurable field formula execution error details.

Product Area	Request number	Fixed issue description
Time Entry	CPC-2014-08960	Endless loop of pop-ups when double-clicking 'Submit' button on time sheet.
Time Entry	CPC-2016-04435	Time can be entered after the closed fiscal period cutoff date when the following dates adjacent to the cutoff date are nonworking days.
Time Entry	CPC-2017-00700	Time entry is not saved for the last day of the week when the Tab key is pressed.
Time Entry	CPC-2017-01053	Improved timesheet performance when moving to a new calendar week in the time sheet.
Time Entry	CPC-2017-01059	Completing task assignment from timesheet does not update assignment actual finish date.
Time Entry	CPC-2017-01463	Duplicate time records appear on the Time Listing with Costs and Billing Information report if the time entries were booked under a split billing engagement and time records were invoiced.
Time Entry	CPC-2017-01505	Adjusted time entries cannot be deleted after being rejected.
Workflow	CPC-2017-00525	Workflow second escalation does not assign the workflow step to the role specified for the assignment, when the first step escalation assignment is a system defined role.
